

Bronx Community Health Dashboard: *Gynecologic Cancers (Cervical, Ovarian, and Uterine Cancers)*

Last Updated: 9/24/2019

See last [slide](#) for more information about this project.

Ovarian cancer incidence

The Bronx has the lowest ovarian cancer rate as compared to other NYC boroughs

³ Data source: New York State Cancer Registry, 2012-2016.

Ovarian cancer rates have declined by 26% in the Bronx overall

4 Data source: New York State Cancer Registry, 1976-2016.

In the Bronx, the ovarian cancer rate is highest among non-Hispanic white women

5 Data source: New York State Cancer Registry, 2012-2016.

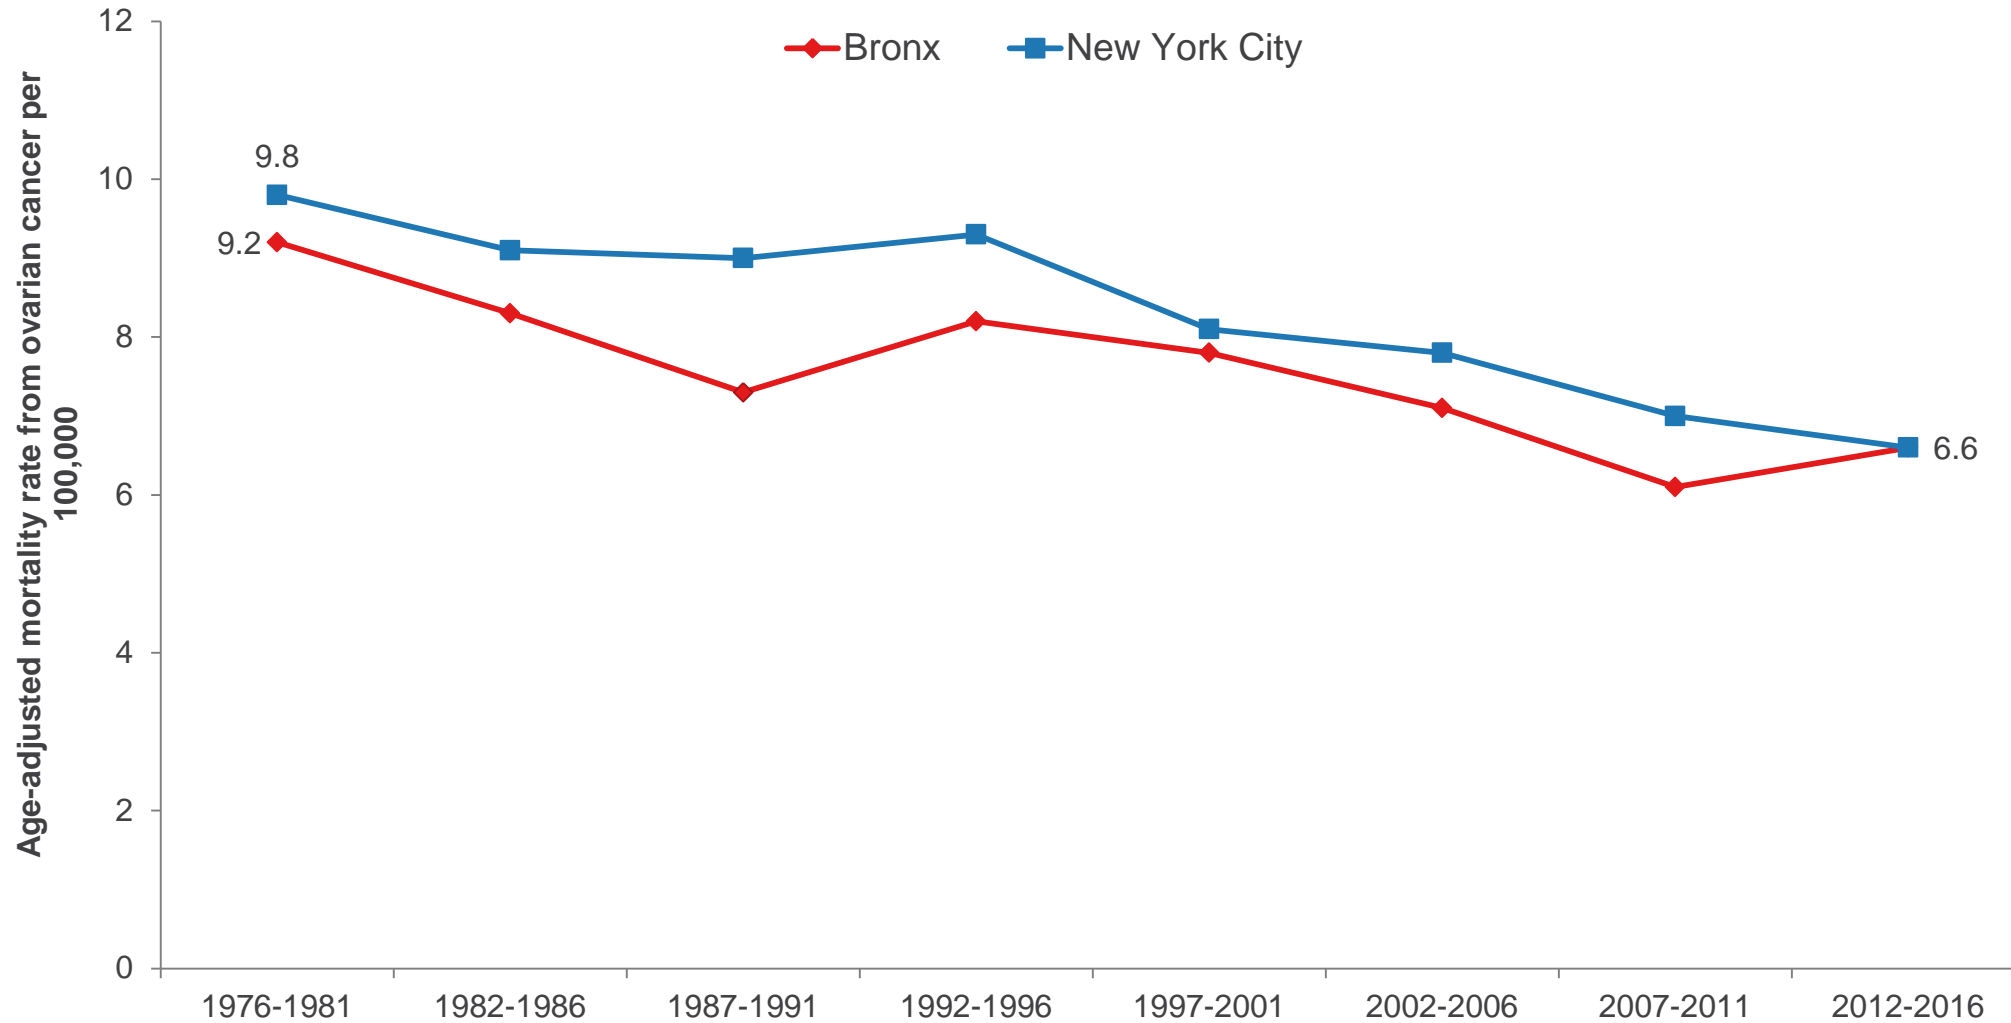

Mortality from ovarian cancer

The mortality rate from ovarian cancer in the Bronx is average compared to other NYC boroughs

7 Data source: New York State Cancer Registry, 2012-2016.

Mortality rates from ovarian cancer have declined by 28% in the Bronx overall

⁸ Data source: New York State Cancer Registry, 1976-2016.

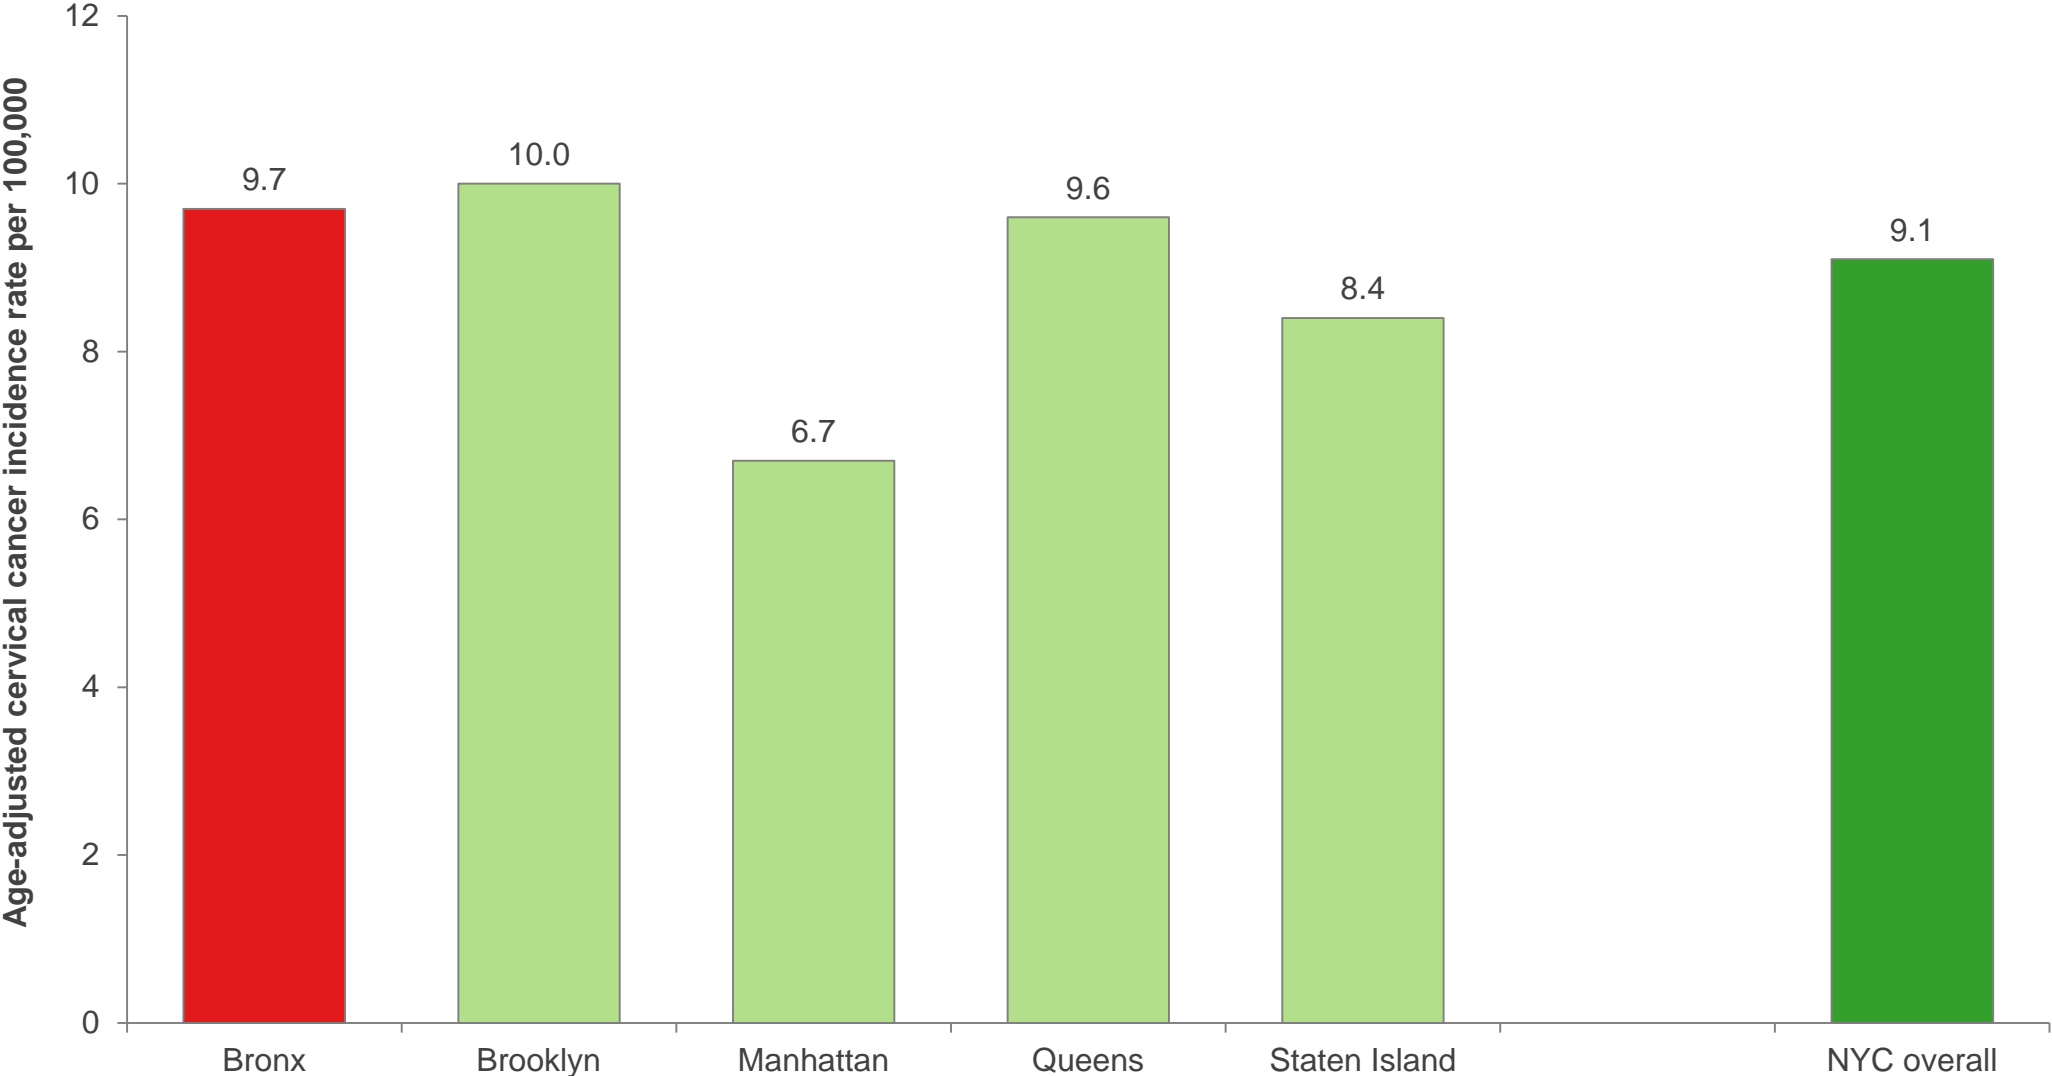

In the Bronx, the mortality rate from ovarian cancer is highest among non-Hispanic white women

9 Data source: New York State Cancer Registry, 2012-2016.

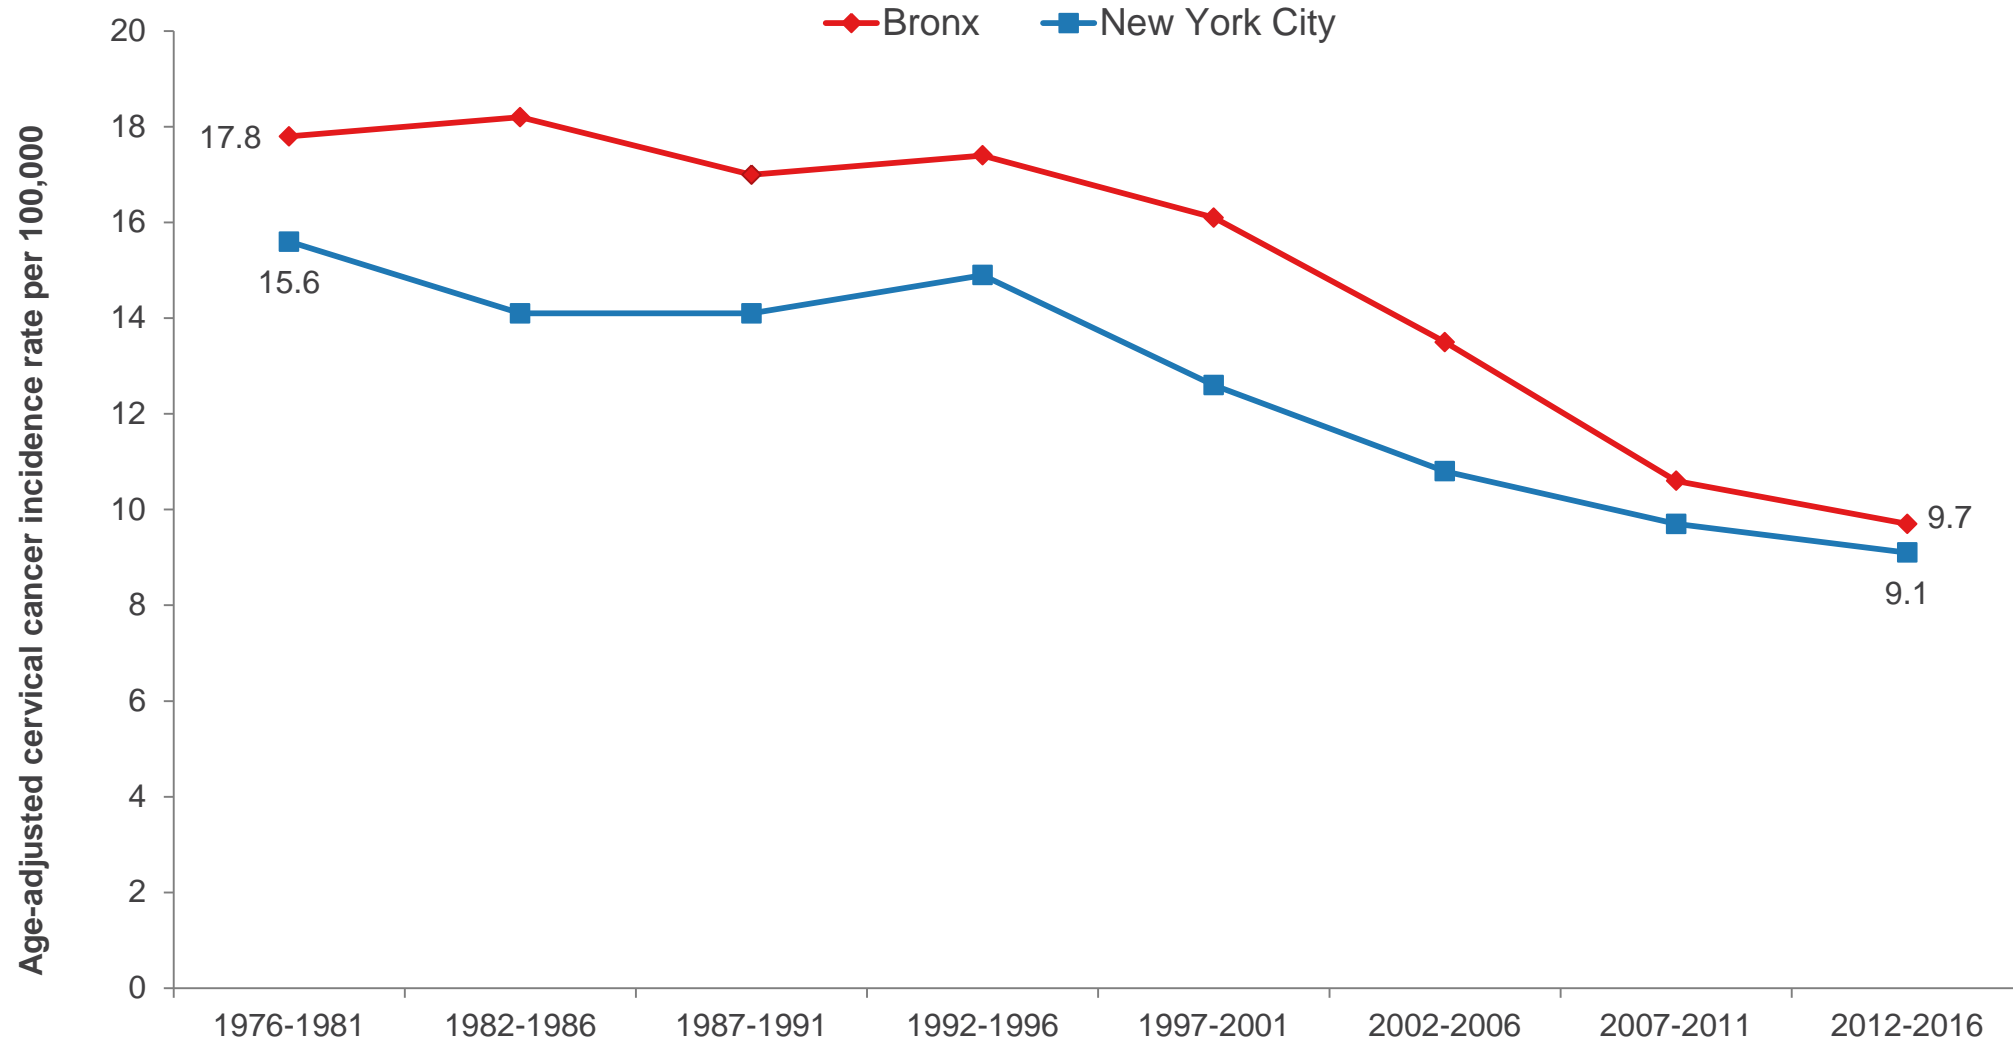

Cervical cancer incidence

The cervical cancer rate is about average in the Bronx

11 Data source: New York State Cancer Registry, 2012-2016.

Cervical cancer rates have decreased by 45% in the Bronx

¹² Data source: New York State Cancer Registry, 1976-2016.

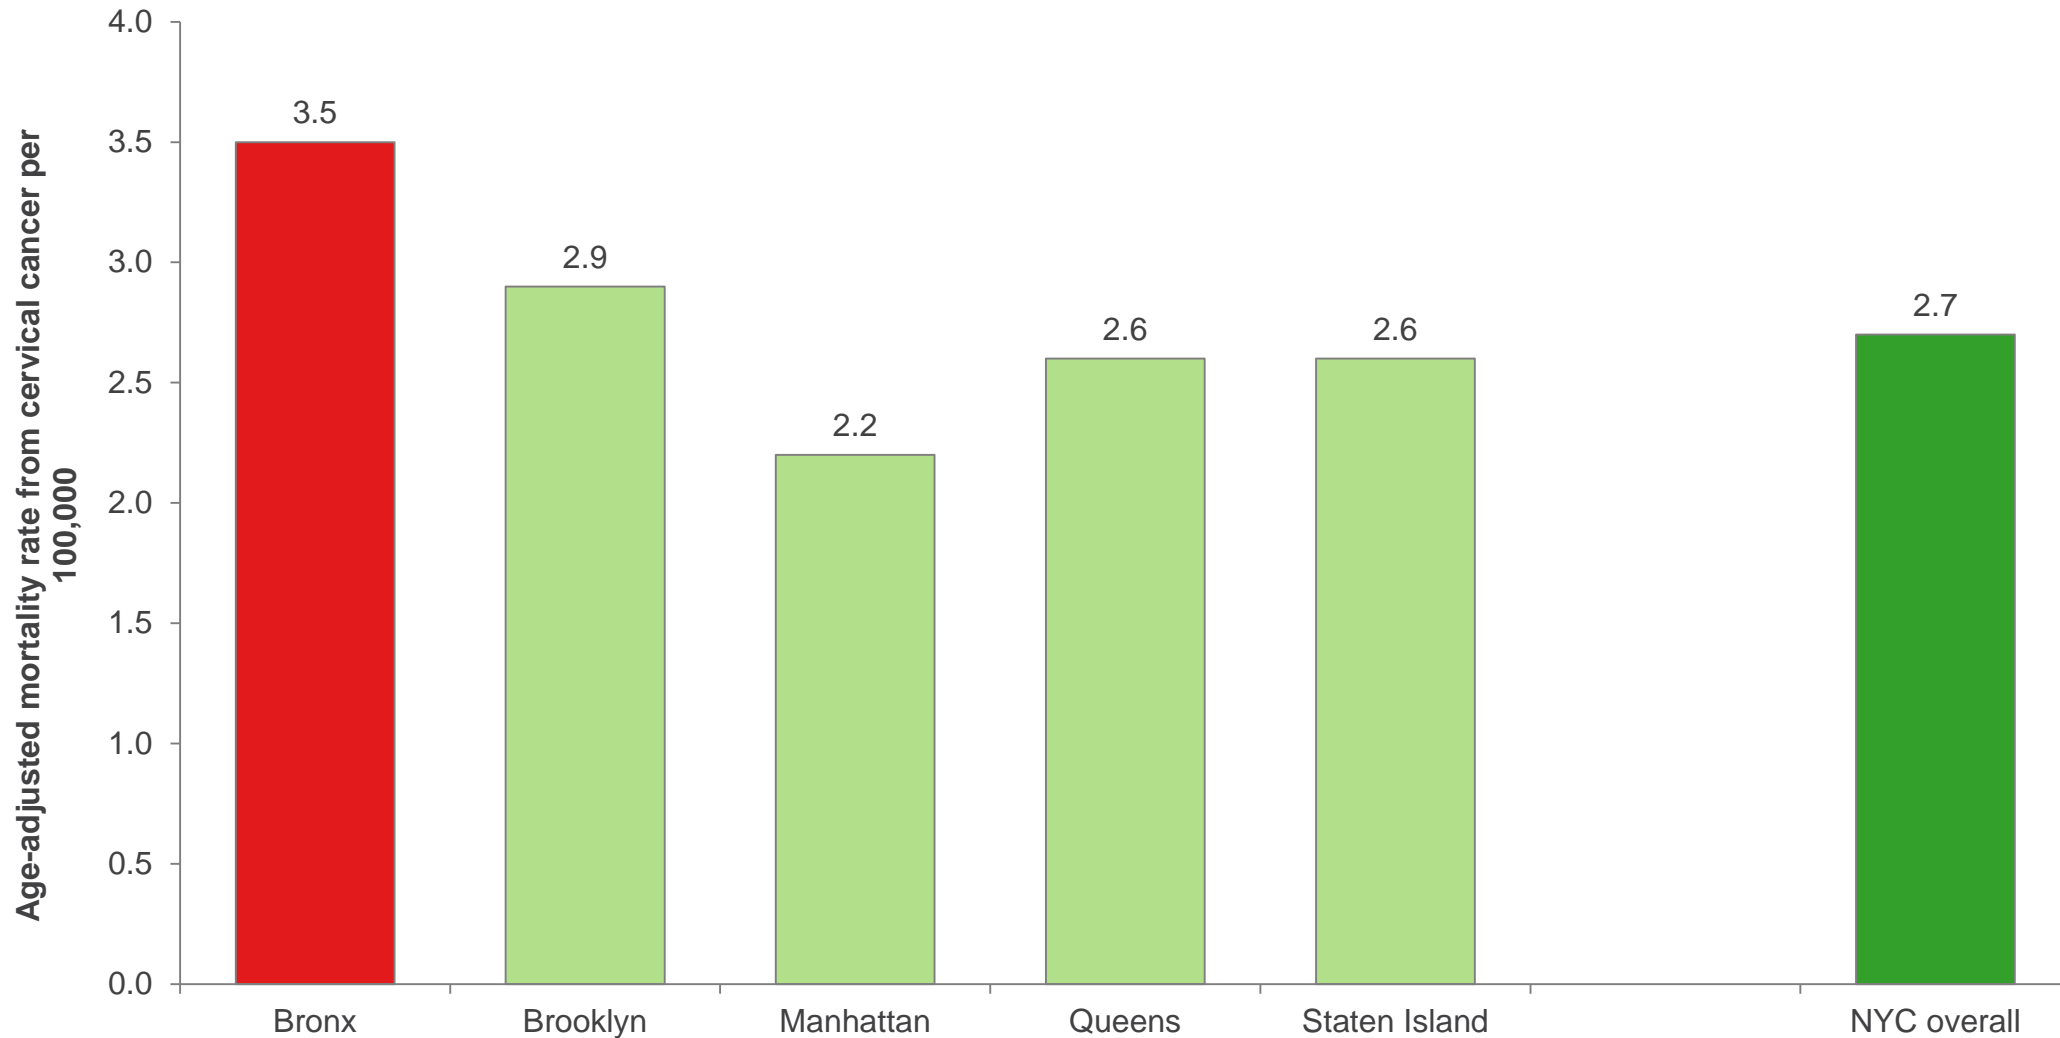

In the Bronx, the cervical cancer rate is highest among non-Hispanic black women

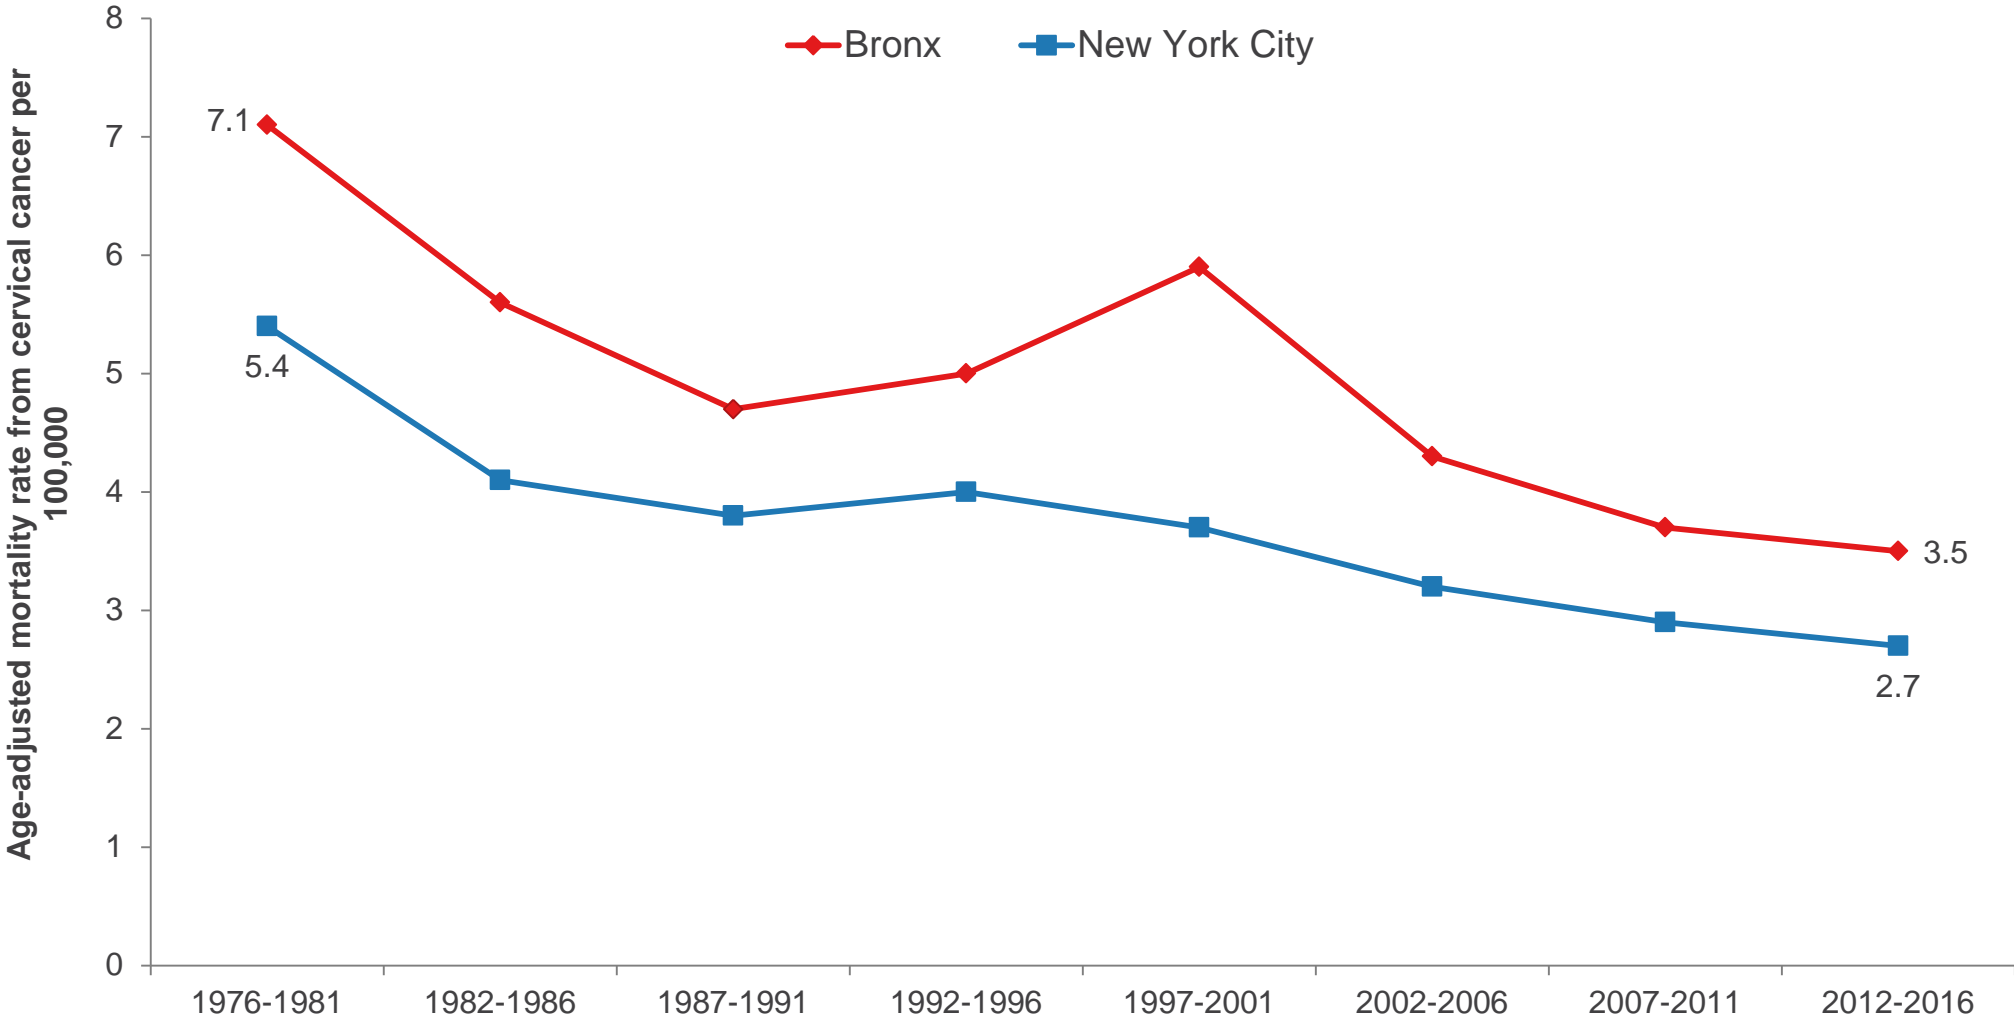

¹³ Data source: New York State Cancer Registry, 2012-2016.

Mortality from cervical cancer

In the Bronx, cervical cancer mortality rates are higher than in other NYC boroughs

Mortality rates from cervical cancer have decreased by 50% in the Bronx

16 Data source: New York State Cancer Registry, 1976-2016.

In the Bronx, the mortality rate from cervical cancer is highest among non-Hispanic black women

Uterine cancer incidence

The uterine cancer incidence rate is about average in the Bronx

¹⁹ Data source: New York State Cancer Registry, 2012-2016.

Uterine cancer incidence rates have increased by 59% in the Bronx

²⁰ Data source: New York State Cancer Registry, 1976-2016.

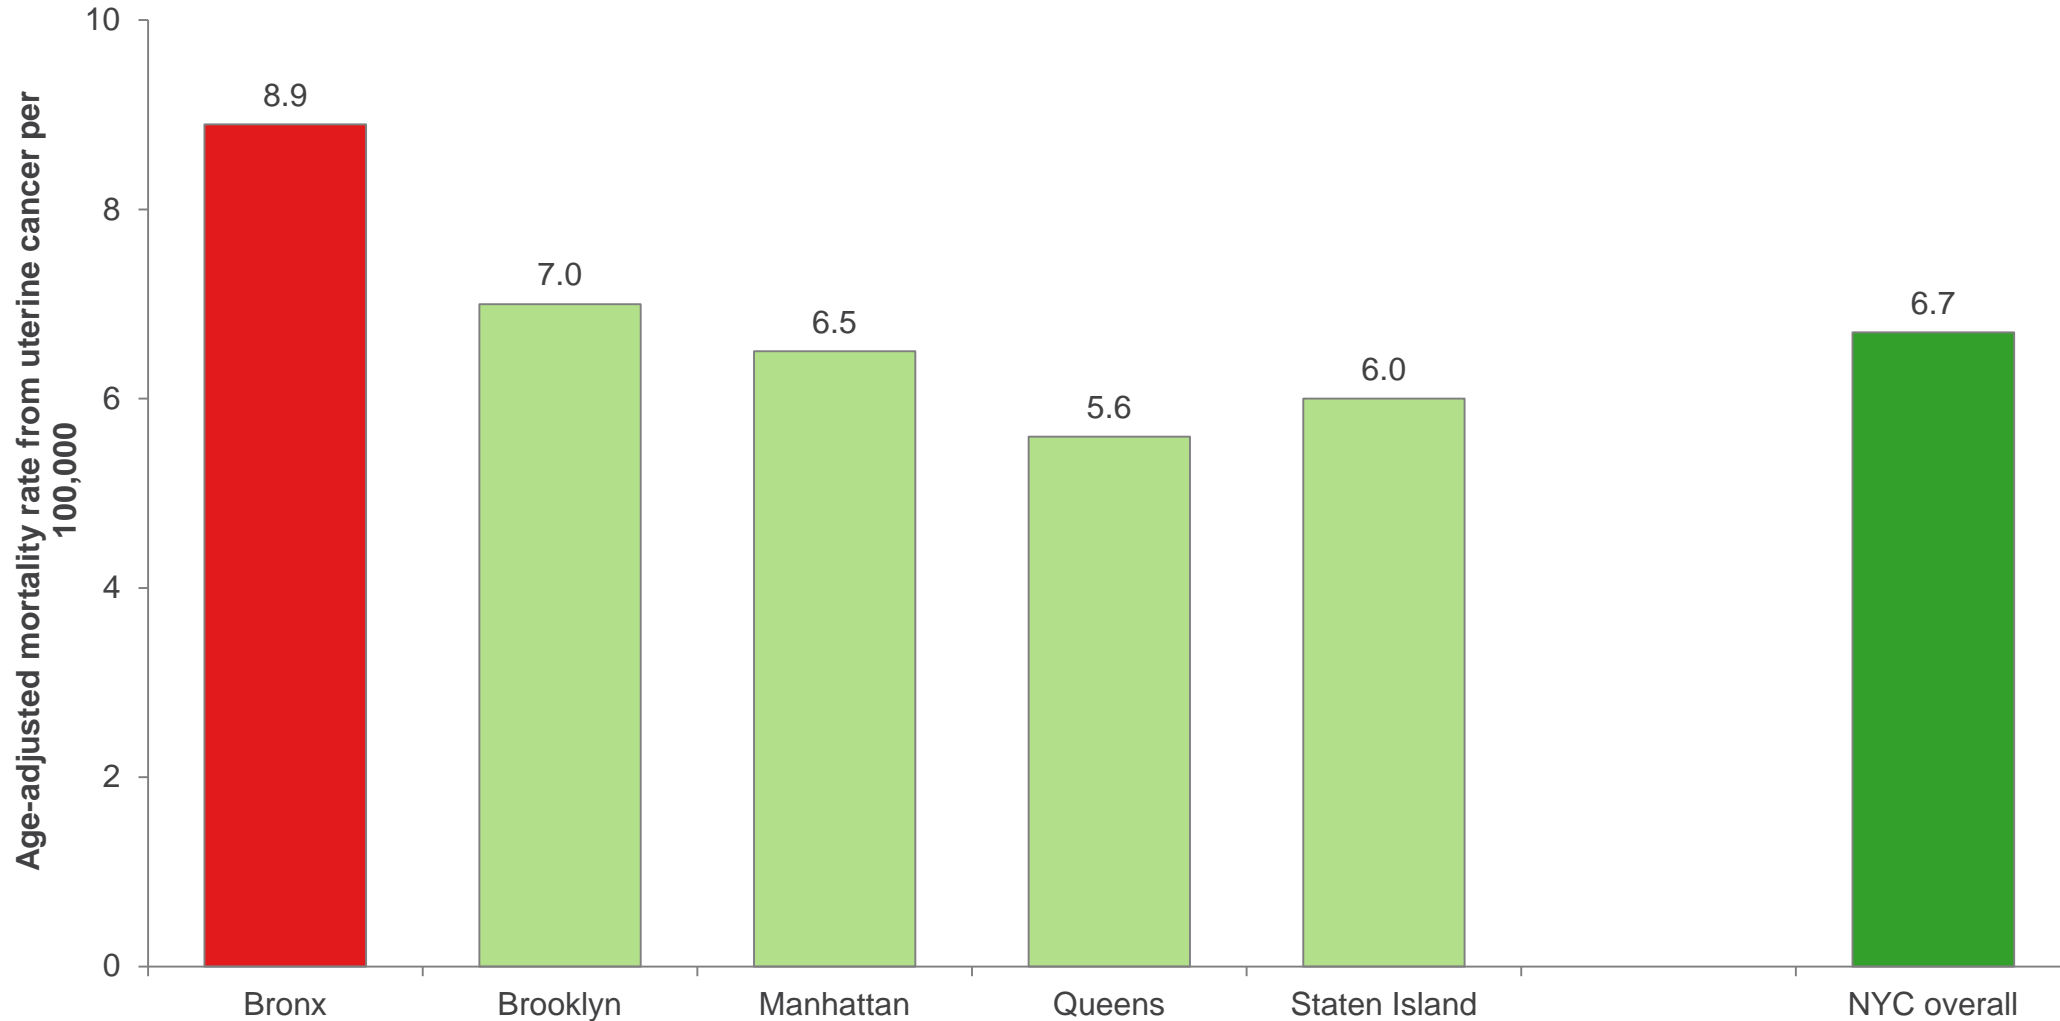

In the Bronx, the uterine cancer incidence rate is highest among non-Hispanic white women

²¹ Data source: New York State Cancer Registry, 2012-2016.

Mortality from uterine cancer

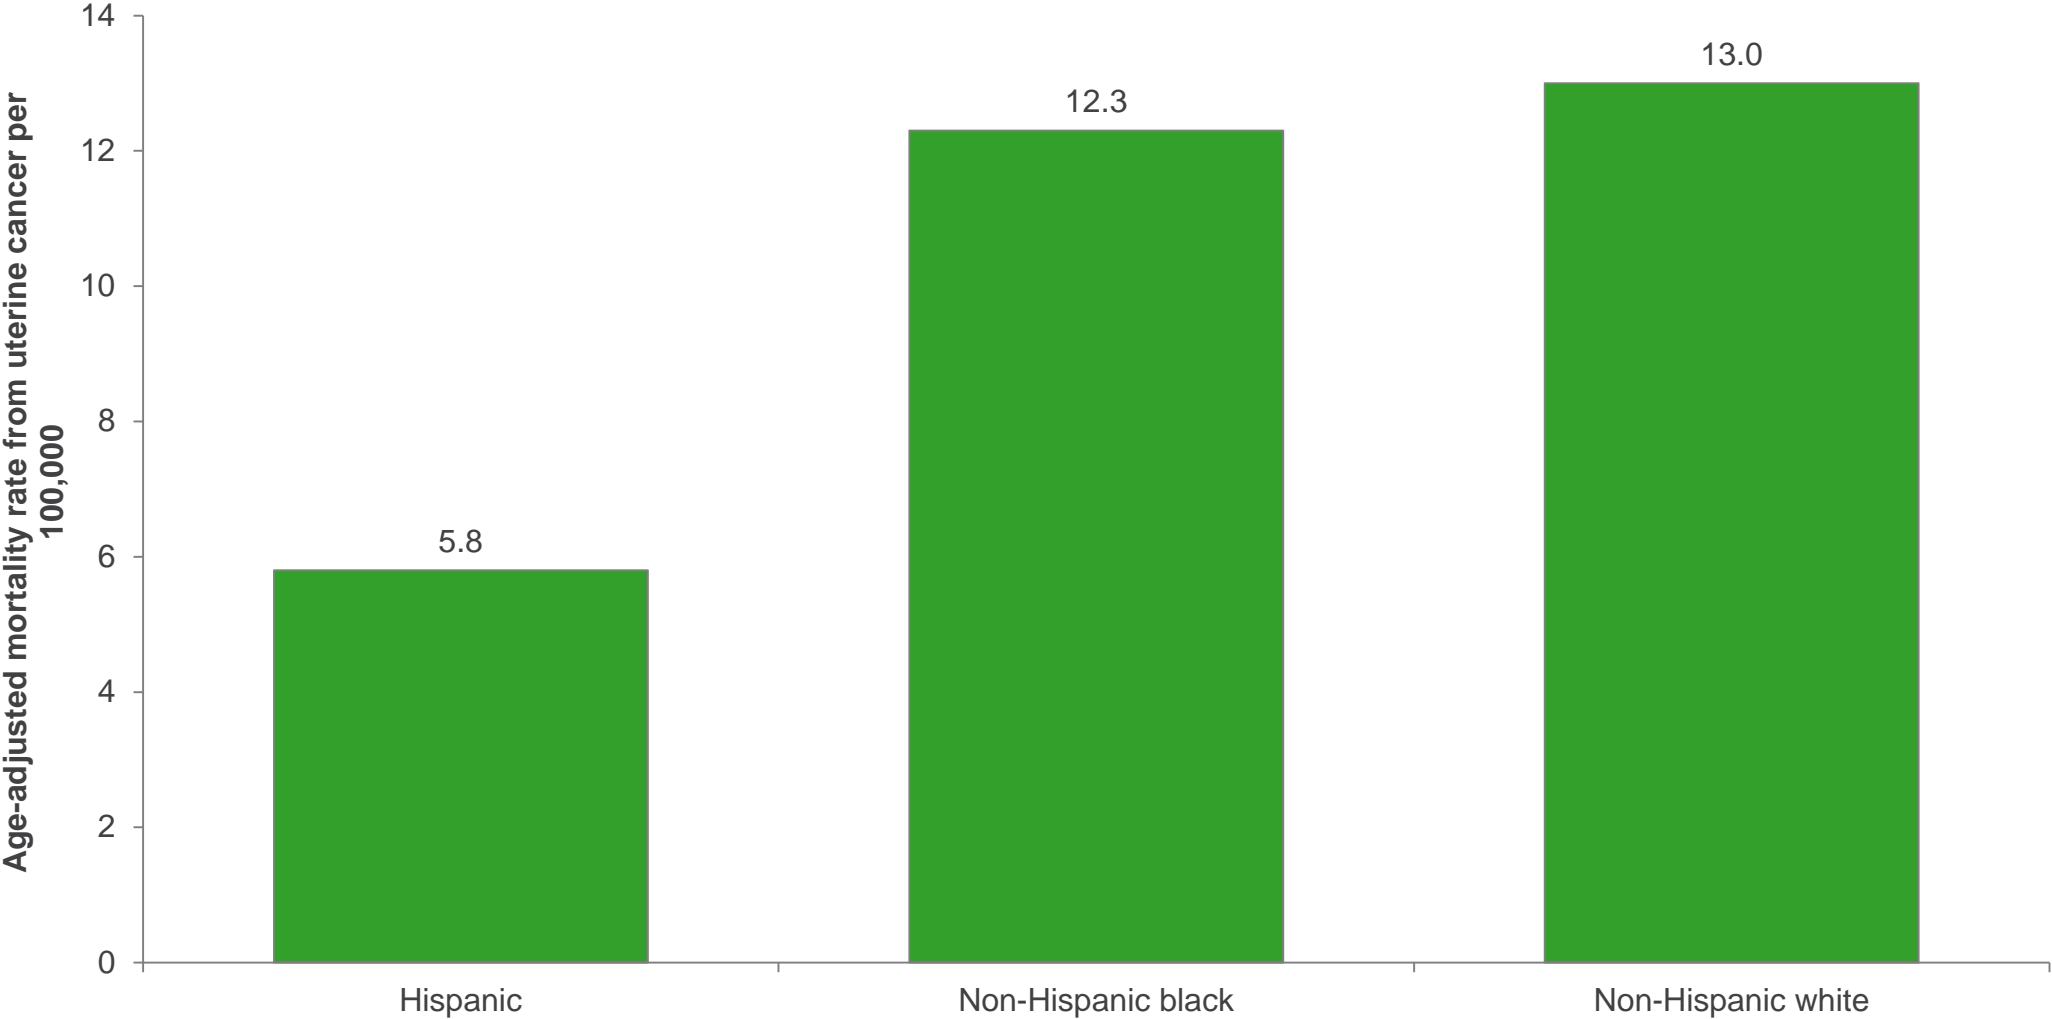

In the Bronx, the uterine cancer mortality rate is higher than other NYC boroughs

Mortality rates from uterine cancer have increased by 42% in the Bronx

In the Bronx, the uterine cancer mortality rate is highest among non-Hispanic white and black women

25 Data source: New York State Cancer Registry, 2012-2016.

About the Community Health Dashboard Project

- The goal of the project is to provide Bronx-specific data on risk factors and health outcomes with an emphasis on presenting data on trends, socio-demographic differences (e.g., by age, sex, race/ethnicity, etc.) and sub-county/neighborhood level data
- Data will be periodically updated as new data becomes available.
- Produced by Montefiore's Office of Community & Population Health using publicly-available data sources
- For more information, please contact us at OCPHDept@montefiore.org
